LATEST & GREATEST

DriveCaptive

Offering customers special offers and promotions to come into your store is nothing new. But presenting customers with targeted offers based on what they've viewed on your site, where they are geographically, how long they've been browsing, and other personalized information, changes the game.

With our logic-based DriveCaptive platform, offers can be strategically placed in front of the right customers to give them that final push needed to get them into your showroom.

LOCAL LISTINGS MANAGEMENT

There are hundreds of online directories and consistency across all of them is necessary to build authority with search engines. However, monitoring and managing all directories out there to ensure business information remain consistent and accurate can be difficult and time consuming.

Local Listing Management powered by Dealer Watch is the solution by keeping your online business listings up-to-date and available however your customers are searching for you.

Our AutoBot features artificial intelligence that conducts a conversation on behalf of a dealer, but also allows dealership personnel to jump into the chat and take over.

With AutoBot technology you have the potential to reach customers more efficiently, with high levels of customer engagement.

Dealer eProcess is pleased to announce its NEW website integration with CARFAX®. One of the first website providers to include this feature, customers now have the ability to quickly filter available vehicles based on top CARFAX® condition categories.

In an effort to continue to provide industry-leading website features and optimal user experience, Dealer eProcess has increased the website integration with CARFAX®.

TRAINING

Two new videos have been added to DEP University!

Be sure to check them out soon!
